**LETTER OF TRANSMITTAL**

March 25, 2014

Board of Retirement  
Stanislaus County Employees' Retirement Association  
832 12<sup>th</sup> Street, Suite 600  
Modesto, CA 95353

Dear Members of the Board:

At your request, we have conducted an actuarial valuation of the Stanislaus County Employees' Retirement Association (StanCERA, the Fund, the Plan) as of June 30, 2013. This report contains information on the Plan's assets and liabilities. This report also discloses employer contribution levels and required disclosures under the Governmental Accounting Standards Board Statement Nos. 25 and 27. Your attention is called to the Foreword in which we refer to the general approach employed in the preparation of this report.

The purpose of this report is to present the results of the annual actuarial valuation of StanCERA. This report is for the use of StanCERA and its auditors in preparing financial reports in accordance with applicable law and accounting requirements. Any other user of this report is not an intended user and is considered a third party.

Cheiron's report was prepared solely for StanCERA for the purposes described herein, except that the Plan auditor may rely on this report solely for the purpose of completing an audit related to the matters herein. It is not intended to benefit any third party, and Cheiron assumes no duty or liability to any such party.

To the best of our knowledge, this report and its contents have been prepared in accordance with generally recognized and accepted actuarial principles and practices which are consistent with the Code of Professional Conduct and applicable Actuarial Standards of Practice set out by the Actuarial Standards Board. Furthermore, as credentialed actuaries, we meet the Qualification Standards of the American Academy of Actuaries to render the opinion contained in this report. This report does not address any contractual or legal issues. We are not attorneys and our firm does not provide any legal services or advice.

Sincerely,  
Cheiron

Robert T. McCrory, FSA, FCA, EA, MAAA  
Principal Consulting Actuary

Graham A. Schmidt, ASA, MAAA  
Consulting Actuary

## FOREWORD

Cheiron has performed the actuarial valuation of the Stanislaus County Employees' Retirement Association as of June 30, 2013. The valuation is organized as follows:

- In Section I, the **Executive Summary**, we describe the purpose of an actuarial valuation, summarize the key results found in this valuation and disclose important trends;
- The **Main Body** of the report presents details on the Plan's
  - Section II - Assets
  - Section III - Liabilities
  - Section IV- Contributions
  - Section V- Required Accounting Disclosures (GASB)
- In the **Appendices** we conclude our report with detailed information describing Plan membership (Appendix A), actuarial assumptions and methods employed in the valuation (Appendix B), a summary of pertinent Plan provisions (Appendix C), a glossary of key actuarial terms (Appendix D), and tables containing member contribution rates (Appendix E).

The results of this report rely on future Plan experience conforming to the underlying assumptions. To the extent that actual Plan experience deviates from the underlying assumptions, the results would vary accordingly.

In preparing our report, we relied without audit, on information supplied by the StanCERA staff. This information includes, but is not limited to, Plan provisions, employee data, and financial information. We performed an informal examination of the obvious characteristics of the data for reasonableness and consistency in accordance with Actuarial Standard of Practice No. 23.

STANISLAUS COUNTY EMPLOYEES' RETIREMENT ASSOCIATION  
ACTUARIAL VALUATION REPORT AS OF JUNE 30, 2013

**SECTION I  
EXECUTIVE SUMMARY**

The primary purpose of the actuarial valuation and this report is to measure, describe, and identify the following as of the valuation date:

- The funded status of the Plan,
- Past and expected trends in the funding progress of the Plan,
- Employer and employee contribution rates for Plan Year 2014-2015; and
- Information required by the Governmental Accounting Standards Board (GASB).

In the balance of this Executive Summary we present (A) the basis upon which this year's valuation was completed, (B) the key findings of this valuation including a summary of all key results, (C) an examination of the historical trends, and (D) the projected outlook for the Plan.

**A. Valuation Basis**

This valuation determines the employer contributions required for the employers' fiscal years beginning July 1, 2014. The employers include the County of Stanislaus and related employers, the City of Ceres and other participating Special Districts.

The Plan's funding policy is to collect contributions from the employers and employees equal to the sum of:

- The Normal Cost under the Entry Age Normal Cost Method,
- Amortization of the Unfunded Actuarial Liability (UAL), and
- The Fund's expected administrative expenses.

The UAL payment is determined as the amount needed to fund the outstanding UAL as of June 30, 2013 over a period of 23 years as a level percentage of pay.

This valuation was prepared based on the Plan provisions shown in Appendix C. There have been changes in Plan provisions since the prior valuation, notably the inclusion of the new benefit provisions required for new members hired on or after January 1, 2013 as a result of enactment of the California Public Employees' Pension Reform Act of 2013 (PEPRA).

Actuarial experience studies are performed every three years. This valuation was performed on the basis of the economic and demographic assumptions and methods that were determined in the Actuarial Experience Study performed by EFI/Cheiron as of June 30, 2012 and adopted by the Board on January 22, 2013. A summary of the assumptions and methods used in the current valuation is shown in Appendix B.

Due to the merger of EFI and Cheiron, the June 30, 2013 actuarial valuation was prepared using Cheiron's valuation system. We replicated the results using the legacy EFI valuation software prior to performing the June 30, 2013 actuarial valuation. The liability and contribution rate results both matched within 2.5% between the valuation systems.

SECTION I  
EXECUTIVE SUMMARY

**B. Key Findings of this Valuation**

The key results of the June 30, 2013 actuarial valuation are as follows:

- The actuarially determined employer contribution rate increased from 20.73% of payroll to 22.94% of payroll for the current valuation, reflecting a 2-year phase-in of the impact of changes to the Actuarial Cost Method. Without the phase-in, the employer contribution rate would have increased to 24.00% of payroll for the current valuation.
- The Plan's funded ratio, the ratio of Actuarial Assets over Actuarial Liability, decreased slightly from 76.9% last year to 76.7% as of June 30, 2013 before any changes in actuarial methods or assumptions.
- The Plan's funded ratio increased from 76.7% to 79.4% following method and assumption changes. The change in the Actuarial Cost Method accounted for most of this 2.7% increase.
- The Unfunded Actuarial Liability (UAL) is the excess of the Plan's Actuarial Liability over the Actuarial Value of Assets. The Plan experienced a decrease in the UAL from \$436.9 million to \$395.1 million as of June 30, 2013. This decrease in UAL was primarily due to the change in Actuarial Cost Method.
- During the year ended June 30, 2013, the return on Plan assets was 13.9% on a market value basis net of investment (but not administrative) expenses, as compared to the 7.75% assumption. The Actuarial Value of Assets recognizes 20% of the difference between the expected and actual return on the market value of assets (MVA). This method of smoothing the asset gains and losses returned 7.0% on the smoothed value of assets, an actuarial asset loss of \$10.2 million. The loss in the Actuarial Value of Assets reflected the continued recognition of investment losses from 2011-12.
- During the 2012-13 Plan Year, the actuarial liabilities of the Plan increased slightly more than expected due to salary changes and new entrants. These and other unexpected changes resulted in a small liability loss of \$8.5 million.
- There were changes in the Actuarial Cost Methods which reduced the Actuarial Liability, offset by changes in the valuation software and minor assumption changes which increased the Actuarial Liability. The net impact of the method, assumption and software changes was a reduction in the Actuarial Liability of \$63.4 million.
- Overall participant membership increased compared to last year. There were 329 new hires and rehires during 2012-2013 and the total active population increased from 3,894 to 3,924. Total projected payroll increased from \$215,057,468 to \$222,897,794.
- The Actuarial Experience Study as of June 30, 2012 recommended changes to the Actuarial Cost Method – from the Aggregate Entry-Age-to-Decrement method to the Individual Entry-

STANISLAUS COUNTY EMPLOYEES' RETIREMENT ASSOCIATION  
ACTUARIAL VALUATION REPORT AS OF JUNE 30, 2013

SECTION I  
EXECUTIVE SUMMARY

Age-to-Final-Decrement method. The Retirement Board adopted these changes for the June 30, 2013 valuation. The County requested, and the Retirement Board agreed to implement, a two year phase-in of the impact of these changes on the employer contribution rates. The schedule of required employer contributions with and without the phase-in is shown in Table I-1 below.

<b>Plan Year</b>	<b>Full Contribution</b>	<b>Phased Contribution</b>
2014-15	24.0%	22.9%
2015-16	24.0%	24.0%
2016-17	23.7%	23.7%
2017-18	23.3%	23.4%

The net impact of the phase-in is to reduce the employer contribution rate by just over 1.0% from what it would have been without phase-in for 2014-15. This is followed by contributions higher than they would have been without phase-in by approximately 0.0%-0.1% of pay in the years 2016-17 and later. This phase-in of rate increases is consistent with practices described by the California Actuarial Advisory Panel (CAAP), as well as other actuarial organizations.

On the next page we present Tables I-2 and I-3 which summarize the key results of the valuation with respect to assets and liabilities, contributions and membership. The results are presented and compared for both the current and prior Plan year.

We note in Table I-3 that the ratio of retirement members to active members continues to increase, indicating the ongoing maturation of the Plan.

STANISLAUS COUNTY EMPLOYEES' RETIREMENT ASSOCIATION  
ACTUARIAL VALUATION REPORT AS OF JUNE 30, 2013

**SECTION I  
EXECUTIVE SUMMARY**

**Assets and Liabilities**

Table I-4 presents a comparison between the June 30, 2012 and June 30, 2013 StanCERA assets, liabilities, Unfunded Actuarial Liability, and funding ratios, both on a market and smoothed basis.

Table I-4 indicates that the Actuarial Liability increased by 1.6% and the Actuarial Value of Assets increased by 5.0%, resulting in an increase in the funding ratio from 76.9% as of June 30, 2012 to 79.4% as of June 30, 2013. StanCERA employs a commonly used actuarial smoothing method on the market value that dampens market volatility, so the Actuarial Value of Assets increased by less than the market value, because of the impact of deferred investment losses from 2011-12 and deferred investment gains from the current year. The funding ratio measured on a market value of assets basis was also 79.4% as of June 30, 2013.

Section II provides additional information explaining the development of the Actuarial Value of Assets.

<b>Table I-4</b>

\* Decline in active Actuarial Liability primarily due to change in Actuarial Cost Method.

STANISLAUS COUNTY EMPLOYEES' RETIREMENT ASSOCIATION  
ACTUARIAL VALUATION REPORT AS OF JUNE 30, 2013

SECTION I  
EXECUTIVE SUMMARY

**Changes in UAL**

The Unfunded Actuarial Liability (UAL) for StanCERA decreased by \$41.8 million, from \$436.9 million to \$395.1 million. Table I-5 below presents the specific components of the change in the UAL.

As noted above, the return on the actuarial assets used to compute the UAL and the employer contribution rate was 7.0% during the 2012-13 Plan year. Investment returns lower than the assumed rate of 7.75% increased the UAL by \$10.2 million. There were also small liability losses that increased the UAL by \$8.5 million, partly due to salary losses and new entrants. Assumption changes increased the UAL by \$10.3 million, while the changes in the Actuarial Cost Method and actuarial software combined to reduce the UAL by \$73.7 million.

The expected change in the UAL due to the yearly amortization of the UAL balance - an increase of \$2.9 million, as a result of negative amortization for the current year - combined with the above UAL changes to produce an overall reduction of \$41.8 million in the UAL last year.

<b>Table I-5</b>	
<b>Increase in Unfunded Actuarial Liability</b>	
<b>Experience</b>	<b>in millions</b>
1. Unfunded actuarial liability, 6/30/2012	\$ 436.9
2. Expected change in unfunded actuarial liability	\$ 2.9
3. Unfunded increase due to investment loss	10.2
4. Unfunded increase due to liability loss	8.5
5. Unfunded decrease due to change in actuarial cost method	(73.7)
6. Unfunded increase due to assumption changes	10.3
7. Total change in unfunded actuarial liability	\$ (41.8)
8. Unfunded actuarial liability, 6/30/2013	\$ 395.1

**Changes in Employer Contributions**

Thus far the experience of the 2012-13 Plan year has been presented in terms of the UAL and funded ratio. Table I-6 on the next page summarizes the impact of actuarial experience and changes in assumptions on the employer contribution rate.

STANISLAUS COUNTY EMPLOYEES' RETIREMENT ASSOCIATION  
ACTUARIAL VALUATION REPORT AS OF JUNE 30, 2013

**SECTION I  
EXECUTIVE SUMMARY**

<b>Item</b>	<b>Total</b>	<b>Normal Cost</b>	<b>Amortization</b>	<b>Admin Expense</b>
FYE 2014 Net Employer Contribution Rate	20.73%	5.88%	13.87%	0.98%
Change Due to Asset Loss	0.33%	0.00%	0.33%	0.00%
Change Due to Demographic Losses	0.61%	0.00%	0.60%	0.01%
Change Due to Methods / Assumptions				
Actuarial Cost Method (Individual EAN-to-Final)	2.13%	5.70%	-3.57%	0.00%
Valuation Software	-0.10%	-0.48%	0.43%	-0.05%
Economic Assumptions (Wage Growth and Crediting)	<u>0.30%</u>	<u>0.17%</u>	<u>0.13%</u>	<u>0.00%</u>
<b><i>FYE 2015 Net Employer Contribution Rate - Full</i></b>	<b>24.00%</b>	<b>11.27%</b>	<b>11.79%</b>	<b>0.94%</b>
<i>Impact of Phase-in</i>	<u>-1.07%</u>	<u>-2.85%</u>	<u>1.79%</u>	<u>0.00%</u>
<b><i>FYE 2015 Net Employer Contribution Rate - Phased</i></b>	<b>22.94%</b>	<b>8.42%</b>	<b>13.58%</b>	<b>0.94%</b>

A review of the changes in the employer contribution rate from the prior valuation reveals that Plan experience during the year – including demographic and salary changes, as well as asset experience – resulted in a net increase in the employer contribution rate of 0.94% of pay before changes in the actuarial methods and assumptions are taken into account:

- Asset experience produced an investment gain on a market basis, but deferred losses produced an investment loss in the actuarial (smoothed) value of Plan assets which increased the contribution rate by 0.33% of pay.

The assets of the Plan returned 13.9% (net of investment expenses) on a market basis, higher than the assumed rate of 7.75%. Under the actuarial asset smoothing policy, 20% of this gain is recognized in the current year. The actuarial and market value of assets are now very close, with a net \$1.1 million in deferred losses as of June 30, 2013.

- Demographic experience increased cost by 0.61% of pay.

The demographic experience of the Plan – rates of retirement, death, disability, and termination, as well as salary and COLA changes – caused an increase in cost. Salary experience, new entrants and lower than expected mortality rates contributed to this increase, offset by lower than expected Cost of Living Adjustments (COLAs) for current retirees.

Changes to the Plan's Actuarial Cost Method, economic assumptions and the actuarial software used to compute the Plan's liabilities resulted in an increase in the contribution rate of 2.33% of pay.

STANISLAUS COUNTY EMPLOYEES' RETIREMENT ASSOCIATION  
ACTUARIAL VALUATION REPORT AS OF JUNE 30, 2013

SECTION I  
EXECUTIVE SUMMARY

- The Experience Study (and the outside Actuarial Audit performed by Segal in 2013) recommended a change in the Actuarial Cost Method: from the Aggregate Entry Age-to-Decrement Method to the Individual Entry Age-to-Final-Decrement. This change will bring the Plan's funding calculations in line with those that must be used for disclosure purposes for the new Government Account Standards Board pension accounting standards (GASB 67/68). The change in Cost Method reduced the Actuarial Liability and amortization payment, but increased the Normal Cost, for a net increase of 2.13% in the contribution rate.
- As a result of merger between Cheiron and EFI Actuaries, the valuation software was changed to use Cheiron's system: Proval, which is recognized as an industry standard. As part of the change in actuarial software, a minor modification was made to allocate Normal Costs over each member's years of benefit service, rather than vesting service. This change is required under the new GASB standards.

The software was also updated to apply the terminal pay load to all service retirements, rather than just those with at least 20 years of service, as recommended by Segal as part of the actuarial audit. The net impact of the change in valuation software was to reduce the contribution rate by 0.1% of pay.

- Economic assumptions were changed.

The interest crediting rate for employee contributions was increased from 0% to 0.25% for the 2013 valuation. Additionally, the base salary increase assumption for County Safety Members was increased for 2014 to 13.40% (previously 3.50%), dropping back down to 3.50% for 2015 and thereafter. This assumption change is a one-time event in recognition of negotiations which resulted in substantial salary increases in exchange for the employer no longer picking up the members' employee contributions. These economic assumption changes increased Plan contributions by 0.30% of pay.

**Plan Risk**

Table I-7 below shows the ratio of assets to active member payroll for StanCERA.

Active Member Payroll	222,897,794
Assets (Market Value)	1,523,019,807
Ratio of Assets to Payroll	6.83
Ratio with 100% Funding	8.61

**SECTION I**  
**EXECUTIVE SUMMARY**

One of the most important measures of a plan's risk is the ratio of plan assets to payroll. The table above shows StanCERA's assets as a percentage of active member payroll. This ratio indicates the sensitivity of the Plan to the returns earned on Plan assets. We note in the table that Plan assets currently are nearly 7 times covered payroll for the Plan; as funding improves and the Plan reaches 100% funding, the ratio of asset to payroll will increase to nearly 9 times payroll, perhaps higher depending on the Plan's future demographic makeup.

To appreciate the impact of the ratio of assets to payroll on plan cost, consider the situation for a new plan with almost no assets. Even if the assets suffer a bad year of investment returns, the impact on the plan cost is nil, because the assets are so small.

On the other hand, consider the situation for StanCERA. Suppose StanCERA's assets lose 10% of their value in a year. Since they were assumed to earn 7.75%, there is an actuarial loss of 17.75% of Plan assets. Based on the current ratio of asset to payroll (683%), that means the loss in assets is about 120% of active payroll (683% of the 17.75% loss). There is only one source of funding to make up for this loss: the employers. Consequently, barring future offsetting investment gains, the employer has to make up the asset loss in future contributions. In this example of a one year loss of 10%, this shortfall will eventually require an additional annual amortization payment in the vicinity of 8.14% of payroll if amortized over 23 years.

As the Plan matures and becomes better funded, the ratio of asset to payroll will increase. When assets are 861% of pay, the 10% loss discussed above will translate to a loss of over 151% of payroll, which when amortized over 23 years will increase the employer contribution by 10.24% of member pay. Therefore, the Plan is likely to become significantly more sensitive to market variation in the future than it is today.

STANISLAUS COUNTY EMPLOYEES' RETIREMENT ASSOCIATION  
ACTUARIAL VALUATION REPORT AS OF JUNE 30, 2013

**SECTION I  
EXECUTIVE SUMMARY**

**C. Historical Trends**

Despite the fact that for most retirement plans the greatest attention is given to the current valuation results and in particular the size of the current Unfunded Actuarial Liability and the employer contribution, it is important to remember that each valuation is merely a snapshot in the long-term progress of a pension fund. It is more important to judge a current year's valuation result relative to historical trends, as well as trends expected into the future.

**Assets and Liabilities**

The chart on the next page compares the Market Value of Assets (MVA) and Actuarial Value of Assets (AVA) to the Actuarial Liabilities. The percentage shown in the table below the graph is the ratio of the Actuarial Value of Assets to the Actuarial Liability (the funded ratio). The funded ratio has declined from 85.0% in 2007 to 79.4% as of June 30, 2013, primarily as a result of the asset losses in 2008-2009.

Valuation Year	2008	2009	2010	2011	2012	2013
Funded Ratio	85.0%	70.9%	76.3%	78.1%	76.9%	79.4%
UAL (Billions)	\$ 0.23	\$ 0.48	\$ 0.41	\$ 0.39	\$ 0.44	\$ 0.40

STANISLAUS COUNTY EMPLOYEES' RETIREMENT ASSOCIATION  
ACTUARIAL VALUATION REPORT AS OF JUNE 30, 2013

SECTION I  
EXECUTIVE SUMMARY

**Contribution Trends**

In the chart below, we present the historical trends for the StanCERA contribution rates. The employer contribution rates have risen since 2008 as result of the investment losses from 2008-2009, compounded by demographic losses and changes to the actuarial assumptions and methods. The impact of these changes was offset to some extent by an extension to the amortization period and additional infusions from the non-valuation reserves. The average employee contribution rates have also increased as the Plan's economic and demographic assumptions have changed.

SECTION I  
 EXECUTIVE SUMMARY

**Gains and Losses**

The following chart for StanCERA presents the pattern of annual gains and losses, broken into the investment and liability components. The investment gains and losses represent the changes on a smoothed basis (i.e. based on the Actuarial Value of Assets). The chart does not include any changes in StanCERA's assets and liabilities attributable to changes to actuarial methods, procedures or assumptions or Plan benefit changes.

The investment loss in 2008-2009 was by far the most significant gain or loss during the last six years. Even though the Plan was using actuarial smoothing of the assets, there was a significant loss reflected in the June 30, 2009 valuation, because the amount of smoothing was limited by the 80/120% corridor around the market value of assets (the return on the smoothed value of assets for 2008-2009 was -9.6%). The Plan also experienced substantial liability losses in 2008 and 2010.

SECTION I  
 EXECUTIVE SUMMARY

**D. Future Expected Financial Trends**

The analysis of projected financial trends is an important component of this valuation. In this Section, we present our assessment of the implications of the June 30, 2013 valuation results in terms of benefit security (assets over liabilities). All the projections in this section are based on the current investment return assumption of 7.75%. We have assumed future total payroll increases of 3.50% per year.

The following graph shows the expected employer contribution rate based on achieving the 7.75% assumption **each year** for the next 20 years. This scenario is highly unlikely: even if the Plan does achieve an **average** return of 7.75% over this time period, the returns in each given year will certainly vary. The graph also includes the 2-year phase-in of the impact of the Actuarial Cost Method change.

The contribution rate graph shows that employer contribution rates are expected to stay relatively stable over the next 20 years, as the current unfunded liability amortization period extends past the end of the projection period (23 years).

**Projection Of Contributions, 7.75% Return Each Year**

The total contribution rate (employer plus employee) is approximately 33% of member payroll for the June 30, 2013 valuation; it is expected to decrease gradually to 31% if all actuarial assumptions are met over the next 23 years. After 23 years, the employer contribution rate is expected to drop due to the end of the current unfunded liability amortization period, to a level around 9% of pay, representing the expected total Normal Cost plus administrative expenses.

STANISLAUS COUNTY EMPLOYEES' RETIREMENT ASSOCIATION  
ACTUARIAL VALUATION REPORT AS OF JUNE 30, 2013

SECTION I  
EXECUTIVE SUMMARY

**Asset and Liability Projections:**

The following graph shows the projection of assets and liabilities assuming that assets will earn the 7.75% assumption each year during the projection period.

**Projection Of Assets And Liabilities, 7.75% Return Each Year**  
(\$ millions)

The graph above shows that the projected funded status increases over the next 20 years to gradually approach 100%, as can be expected based on the amortization policy, assuming the actuarial assumptions are achieved.

However, as above, it is the **actual** return on Plan assets that will determine the future funding status and contribution rate to the Fund. The Actuarial Value of Assets and market value of assets are within 0.1% of each other as of June 30, 2013, so it is difficult to see the orange line that represents the Actuarial Value of Assets.

**SECTION II**  
**ASSETS**

Pension Plan assets play a key role in the financial operation of the Plan and in the decisions the Board may make with respect to future deployment of those assets. The level of assets, the allocation of assets among asset classes, and the methodology used to measure assets will likely impact benefit levels, employer contributions, and the ultimate security of participants' benefits.

In this section, we present detailed information on Plan assets including:

- **Disclosure** of Plan assets as of June 30, 2012 and June 30, 2013;
- Statement of the **changes** in market values during the year;
- Development of the **Actuarial Value of Assets**;
- An assessment of historical **investment performance versus inflation**; and
- An allocation of the unfunded liability between the **valuation subgroups**.

STANISLAUS COUNTY EMPLOYEES' RETIREMENT ASSOCIATION  
ACTUARIAL VALUATION REPORT AS OF JUNE 30, 2013

SECTION II  
ASSETS

**Disclosure**

There are two types of asset values disclosed in the valuation, the market value of assets and the Actuarial Value of Assets. The market value represents “snap-shot” or “cash-out” values which provide the principal basis for measuring financial performance from one year to the next. Market values, however, can fluctuate widely with corresponding swings in the marketplace. As a result, market values are usually not as suitable for long-range planning as are the Actuarial Value of Assets which reflect smoothing of annual investment returns.

Table II-1 on the next page discloses and compares each asset class as of June 30, 2012 and June 30, 2013.

**ASSETS**

**Changes in Market Value**

The components of asset change are:

- Contributions (employers and employee)
- Benefit payments
- Expenses (investment and administrative)
- Investment income (realized and unrealized)

Table II-2 on the next page shows the components of change in the market value of assets during the fiscal years ending June 30, 2012 and June 30, 2013.

**SECTION II  
ASSETS**

**Actuarial Value of Assets (AVA)**

The Actuarial Value of Assets represents a “smoothed” value developed by the actuary to reduce the volatile results which could develop due to short-term fluctuations in the market value of assets. For this Plan, the Actuarial Value of Assets is calculated on a modified market-related value. The market value of assets is adjusted to recognize, over a five year period, investment earnings which are greater than (or less than) the assumed investment return. However, in no event will the Actuarial Value of Assets be less than 80% or more than 120% of market value on the valuation date.

The Valuation Assets are the portion of the Actuarial Assets dedicated to funding the basic pension benefits. The Valuation Assets exclude the value of any non-valuation reserves, such as reserves established for lump sum death benefits (which are not included in the valuation liabilities) and legal contingencies. The Valuation Assets also exclude the value of any non-valuation contingency reserves which have been established according to the Board’s funding policy.

The following table shows the development of the Actuarial Asset and Valuation Assets values. Note, the Actuarial Value of Assets was reset to equal the market value as of June 30, 2011. This was done by eliminating the prior gain/loss bases (i.e. by setting the expected returns equal to the actual returns).

STANISLAUS COUNTY EMPLOYEES' RETIREMENT ASSOCIATION  
ACTUARIAL VALUATION REPORT AS OF JUNE 30, 2013

**SECTION II  
ASSETS**

**Allocation of Unfunded Actuarial Liability by Valuation Subgroup**

The following table shows the allocation of the Unfunded Actuarial Liability between the two valuation subgroups (County Members and City of Ceres / Special District Members). The Valuation Assets are reduced by the liability associated with the inactive members and the refundable contribution balances for active members, and the remaining assets are allocated to each subgroup based on their share of the active liability. These UAL balances are used to calculate each subgroup's amortization payment.

<b>Table II-5</b>				
<b>Allocation of 6/30/2013 Unfunded Liability</b>				
(in thousands)				
	<b>County</b>	<b>CERES</b>	<b>Total</b>	
1. Valuation Assets			\$	1,524,076

7. Remaining Assets	176,934	12,180		189,114
8. Total Assets for Actives [2 + 7]	357,080	24,003		381,083
9. Active Funded Ratio [8 ÷ 5]	49.17%	48.01%		49.09%
10. Unfunded Actuarial Liability [5 - 8]	\$ 369,160	\$ 25,991	\$	395,151

**SECTION III  
LIABILITIES**

In this section, we present detailed information on Plan liabilities including:

- **Disclosure** of Plan liabilities at June 30, 2012 and June 30, 2013;
- Statement of **changes** in these liabilities during the year.

**Disclosure**

Several types of liabilities are calculated and presented in this report. Each type is distinguished by the people ultimately using the figures and the purpose for which they are using them.

- **Present Value of Future Benefits:** Used for measuring all future Plan obligations, represents the amount of money needed today to fully pay off all benefits of the Plan both earned as of the valuation date and those to be earned in the future by current Plan participants, under the current Plan provisions.
- **Actuarial Liability:** Used for funding calculations and GASB disclosures, this liability is calculated taking the Present Value of Future Benefits and subtracting the present value of future Member Contributions and future Employer Normal Costs under an acceptable actuarial funding method. The method used for this Plan is called the **Entry Age Normal** (EAN) funding method.
- **Unfunded Actuarial Liability:** The excess of the Actuarial Liability over the Valuation Assets.

Table III-1 on the following page discloses each of these liabilities for the current and prior valuations. With respect to each disclosure, a subtraction of the appropriate value of Plan assets yields, for each respective type, a **net surplus** or an **Unfunded Actuarial Liability**.

STANISLAUS COUNTY EMPLOYEES' RETIREMENT ASSOCIATION  
ACTUARIAL VALUATION REPORT AS OF JUNE 30, 2013

**SECTION III  
LIABILITIES**

**Changes in Liabilities**

Each of the Liabilities disclosed in the prior tables are expected to change at each valuation. The components of that change, depending upon which liability is analyzed, can include:

- New hires since the last valuation
- Benefits accrued since the last valuation
- Plan amendments increasing benefits
- Passage of time which adds interest to the prior liability
- Benefits paid to retirees since the last valuation
- Participants retiring, terminating, or dying at rates different than expected
- A change in actuarial or investment assumptions
- A change in the actuarial funding method

Unfunded liabilities will change because of all of the above, and also due to changes in Plan assets resulting from:

- Employer contributions different than expected
- Investment earnings different than expected
- A change in the method used to measure Plan assets

<b>Table III-3</b>	
<b>Development of 2013 Experience Gain/(Loss)</b>	
(in millions)	
<b>Item</b>	<b>Cost</b>
1. Unfunded Actuarial Liability at June 30, 2012	\$ 436.9
2. Middle of year actuarial liability payment	(29.8)
3. Interest to end of year on 1 and 2	<u>32.7</u>
4. Expected Unfunded Actuarial Liability at June 30, 2013 (1+2+3)	\$ 439.8
5. Actual Unfunded Liability at June 30, 2013	<u>395.1</u>
6. Difference: (4 - 5)	\$ 44.7

f. Change in Actuarial Cost Method	111.9
g. New entrant loss	(4.2)
h. Other experience	<u>(2.0)</u>
j. Total	44.7

## SECTION IV CONTRIBUTIONS

In the process of evaluating the financial condition of any pension plan, the actuary analyzes the assets and liabilities to determine what level of contributions is needed to properly maintain the funding status of the Plan. Typically, the actuarial process will use a funding technique that will result in a pattern of contributions that are both stable and predictable.

For this Plan, the actuarial funding method used to determine the Normal Cost and the Unfunded Actuarial Liability is the **Entry Age Normal (EAN)** cost method. There are three components to the total contribution: the **Normal Cost rate** (employee and employer), the **Unfunded Actuarial Liability rate** (UAL rate), and the **administrative expense** contribution.

The Normal Cost rate is determined in the following steps. First, an individual Normal Cost rate is determined by taking the value, as of entry age into the Plan, of each member's projected future benefits. This value is then divided by the value, also at entry age, of the member's expected future salary producing a Normal Cost rate that should remain relatively constant over a member's career (Entry-Age-to-Final-Decrement). In prior years, the Normal Cost rate was determined separately for each benefit, and at each possible age (Entry-Age-to-Decrement).

Beginning with the current valuation, the total Normal Cost is computed by adding the expected dollar amount of each active member's Normal Cost for the current year – known as the Individual Entry Age Method. In prior years, the total Normal Cost was computed in aggregate by dividing the future Normal Costs for all members by the present value of future salaries for all members, a method sometimes referred to as the Aggregate Entry Age Method.

The total Normal Cost is adjusted with interest to the middle of the year, to reflect the fact that the Normal Cost contributions are paid throughout the year as member payroll payments are made. Finally, the total Normal Cost rate is reduced by the member contribution rate to produce the employer Normal Cost rate. For the current valuation, the member contribution rate for each subgroup is determined by adding the expected contributions for each member and dividing by the projected pay for each subgroup. In prior years the member contribution rate was determined by dividing the present value of future member contributions by the present value of future salaries.

The Unfunded Actuarial Liability (UAL) is the difference between the EAN Actuarial Liability and the Actuarial Value of Assets. The UAL payment is determined as the amount needed to fund the UAL over a closed 23 year period as a level percentage of payroll.

Beginning with the June 30, 2012 actuarial valuation, the Board adopted a policy of adding an amount equal to the expected annual administrative expense to the employer's required contribution. Prior to the June 30, 2012 actuarial valuation, the administrative expenses were included as an offset to the assumed earnings rate, and were shared between the employees and employers. For the June 30, 2013 valuation, this amount is estimated to be \$2.1 million.

For the current valuation, the Board adopted a two-year phase-in of the impact of the Actuarial Cost Method change on the employer contribution rate.

STANISLAUS COUNTY EMPLOYEES' RETIREMENT ASSOCIATION  
ACTUARIAL VALUATION REPORT AS OF JUNE 30, 2013

**SECTION IV  
CONTRIBUTIONS**

The table below presents the calculation of the contribution rates for the Plan for this valuation and compares the total contribution rate with the prior year rate. The tables on the following pages contain more details on the calculation of the UAL amortization payments, as well as details on the calculation of the contribution rates for each group and tier.

<b>Table IV-1</b>

**SECTION V**  
**ACCOUNTING STATEMENT INFORMATION**

Statement No. 25 of the Governmental Accounting Standards Board (GASB 25) establishes standards for disclosure of pension information by public employee retirement systems (PERS) and governmental employers in notes to financial statements and supplementary information.

The GASB adopted Statement Nos. 67 and 68 which replace GASB Statement Nos. 25 and 27. GASB 67 is effective for periods beginning after June 15, 2013 (first effective June 30, 2014 for the Plan) and GASB 68 is effective for fiscal years beginning after June 15, 2014 (first effective for the fiscal year July 1, 2014 to June 30, 2015 for the Employers). The following is a brief summary of some of these changes:

- The liabilities would need to be based on the Entry Age Normal Cost method (which is the method the Plan is currently using), and the discount rate assumption might need to be reduced if projected contributions plus assets are not able to cover projected pension benefits (not expected to be an issue for StanCERA).
- The market value of assets would be compared to the liabilities, instead of the smoothed Actuarial Value of Assets, to determine the unfunded liability.
- A portion of unfunded liabilities would be reported directly on each of the employer's balance sheet.
- The Annual Required Contribution (ARC) would be replaced with Pension Expense which equals: Normal Cost + Interest Cost - Expected Asset Earnings + Amortization of changes in total pension liability + smoothing of asset returns over a five-year period.
- Amortization periods of changes in total pension liability would vary depending upon the basis for the gain or loss. These periods would be immediate for plan changes and expected working lifetime of both active and inactive members for other total pension liability changes.

In accordance with GASB 25, we have prepared the following disclosures:

*Schedule of Funding Progress*

The schedule of funding progress compares the assets used for funding purposes to the comparable liabilities to determine how well the Plan is funded and how this status has changed over the past several years.

The GASB 25 Actuarial Accrued Liability is the same as the Actuarial Liability calculated for funding purposes. The GASB 25 liability is compared to the Actuarial Value of Assets to determine the funding ratio.

*Schedule of Employer Contributions*

The schedule of employer contributions shows whether the employer has made contributions that are consistent with an actuarial method of funding the benefits to be provided consistent with the parameters established by GASB 25.

**STANISLAUS COUNTY EMPLOYEES' RETIREMENT ASSOCIATION  
ACTUARIAL VALUATION REPORT AS OF JUNE 30, 2013**

**SECTION V  
ACCOUNTING STATEMENT INFORMATION**

*Solvency Test*

The solvency test shows the portion of actuarial liabilities for active member contributions, inactive members, and the employer financed portion of the active members that are covered by the Actuarial Value of Assets.

The Actuarial Accrued Liability under GASB 25 is determined assuming that the Plan is ongoing and participants continue to terminate employment, retire, etc., in accordance with the actuarial assumptions. Liabilities are discounted at the assumed valuation interest rate of 7.75%.

**APPENDIX B**  
**STATEMENT OF CURRENT ACTUARIAL ASSUMPTIONS AND METHODS**

The assumptions and methods used in the actuarial valuation as of July 1, 2013 are:

**Actuarial Methods**

**1. Actuarial Cost Method**

Annual contributions to the Stanislaus County Employees' Retirement Association (the Plan) are computed under the Entry Age Normal Actuarial Cost Method, computed to the final decrement.

Under this Cost Method, the Normal Cost is calculated as the amount necessary to fund Members' benefits as a level percentage of total payroll over their projected working lives. At each valuation date, the Actuarial Accrued Liability is equal to the difference between the liability for the Members' total projected benefit and the present value of future Normal Cost contributions.

The excess of the Actuarial Accrued Liability over Plan assets is the Unfunded Actuarial Accrued Liability, and the liability for each valuation group is amortized as a level percentage of payroll over a closed period (23 years as of the current valuation).

Amounts may be added to or subtracted from the Unfunded Actuarial Accrued Liability due to Plan amendments or changes in actuarial assumptions.

The total Plan cost is the sum of the Normal Cost (computed on an Individual basis), the amortization of the Unfunded Actuarial Accrued Liability, and the expected Administrative Expenses.

**2. Actuarial Value of Plan Assets**

The Actuarial Value of Plan assets is modified market-related value. The market value of assets is adjusted to recognize, over a five-year period, differences between actual investment earnings and the assumed investment return. The Actuarial Value of Assets is limited to no less than 80% and no more than 120% of the market value. As of June 30, 2011, the Actuarial Value was reset to equal market value.

The detailed calculations of the Actuarial Value of Plan assets are shown in Section II.

STANISLAUS COUNTY EMPLOYEES' RETIREMENT ASSOCIATION  
ACTUARIAL VALUATION REPORT AS OF JUNE 30, 2013

APPENDIX B  
STATEMENT OF CURRENT ACTUARIAL ASSUMPTIONS AND METHODS

**Actuarial Assumptions**

**1. Rate of Return**

The annual rate of return on all Plan assets is assumed to be 7.75%, net of investment expenses.

**2. Cost of Living**

The cost of living as measured by the Consumer Price Index (CPI) will increase at the rate of 3.25% per year.

**3. Administrative Expenses**

An allowance of \$2,100,000 for Plan administrative expenses has been included in the annual cost calculated.

**4. Interest Credited to Employee Accounts**

The employee accounts are credited with 0.25% interest annually.

**5. Increases in Pay**

Base salary increase: Safety Members employed at a County location  
13.40% for 2013, 3.50% thereafter

All other Members  
3.50% for 2013 and thereafter

Assumed pay increases for active Members consist of increases due to base salary adjustments (as noted above), plus service-based increases due to longevity and promotion, as shown below.

Longevity & Promotion Increases		
Service	General	Safety
0	4.00%	8.00%
1	4.00%	7.00%
2	4.00%	6.00%
3	4.00%	5.00%
4	4.00%	4.00%
5-9	2.00%	2.00%
10-19	1.00%	1.00%
20-29	0.50%	1.00%
30+	0.50%	0.50%

**APPENDIX B**  
**STATEMENT OF CURRENT ACTUARIAL ASSUMPTIONS AND METHODS**

**6. PEPRA Compensation Limit**

The assumption used for increasing the compensation limit that applies to PEPRA members is 3.25%

**7. Post Retirement COLA**

100% of CPI up to 3% annually with banking, 2.7% annual increases assumed.

**8. Social Security Wage Base**

General Plan 3 members have their benefits offset by an assumed Social Security Benefit. For projecting the Social Security Benefit, the annual Social Security Wage Base increase is assumed to be 3.5% per year.

**9. Internal Revenue Code Section 415 Limit**

The Internal Revenue Code Section 415 maximum benefit limitations are not reflected in the valuation for funding purposes. Any limitation is reflected in a member's benefit after retirement.

**10. Internal Revenue Code Section 401(a)(17)**

The Internal Revenue Code Section 401(a)(17) maximum compensation limitation is not reflected in the valuation for funding purposes. Any limitation is reflected in a member's benefit after retirement.

**11. Family Composition**

Percentage married for all active members who retire, become disabled or die during active service is shown in the following table. Women are assumed to be three years younger than men.

Percentage Married	
Gender	Percentage
Males	90%
Females	50%

**12. Accumulated Vacation Time Load**

Active members' service retirement and related benefits are loaded by 2.5% for Safety Members and 3.5% for General Members for conversion of vacation time.

**13. Rates of Separation**

Rates of termination apply to all active Members who terminate their employment.

STANISLAUS COUNTY EMPLOYEES' RETIREMENT ASSOCIATION  
ACTUARIAL VALUATION REPORT AS OF JUNE 30, 2013

**APPENDIX B**  
**STATEMENT OF CURRENT ACTUARIAL ASSUMPTIONS AND METHODS**

Separate rates of termination are assumed among Safety and General Members.

<b>Termination Rates</b>			
<b>Years of Service</b>	<b><u>General</u></b>		<b><u>Safety</u></b>
	<b>Male</b>	<b>Female</b>	<b>All</b>
0	24.0%	14.0%	15.0%
1	14.0%	9.4%	15.0%
2	11.7%	7.9%	10.5%
3	9.4%	7.9%	10.0%
4	7.1%	7.1%	6.0%
5	5.0%	5.0%	3.7%
10	3.5%	3.5%	3.4%
15	2.9%	2.9%	1.9%
20	1.5%	1.5%	0.0%
25	1.3%	1.3%	0.0%
30+	0.0%	0.0%	0.0%

Termination rates do not apply once a member is eligible for retirement.

**14. Withdrawal**

Rates of withdrawal apply to active Members who terminate their employment and withdraw their member contributions, forfeiting entitlement to future Plan benefits. Separate rates of withdrawal are assumed among Safety and General Members, and are based on service. The rates do not overlap with the service retirement rates.

50% of all General Member terminations with less than ten years of service are assumed to take a refund of contributions, as well as 20% of those with ten or more years of service.

35% of all Safety Member terminations with less than ten years of service are assumed to take a refund of contributions, and 10% of those with ten or more years are assumed to take a refund.

**15. Vested Termination and Reciprocal Transfers**

Rates of vested termination apply to active Members who terminate their employment after five years of service and leave their member contributions on deposit with the Plan. Alternatively, those who terminate their employment with less than five years of service can leave their member contributions with the Plan and transfer to a reciprocal employer, therefore retaining entitlement to future Plan benefits.

STANISLAUS COUNTY EMPLOYEES' RETIREMENT ASSOCIATION  
ACTUARIAL VALUATION REPORT AS OF JUNE 30, 2013

**APPENDIX B**  
**STATEMENT OF CURRENT ACTUARIAL ASSUMPTIONS AND METHODS**

Vested terminated Tier 3 General Members are assumed to begin receiving benefits at age 65 while all other General Members are assumed to begin at age 58; terminated Safety Members are assumed to begin receiving benefits at age 53. 25% of vested terminated General Members are assumed to be reciprocal; 50% of vested terminated Safety Members are assumed to be reciprocal.

Reciprocal members are assumed to receive 4% annual pay increases from the date of transfer to the assumed retirement date.

**16. Rates of Service-Connected Disability**

Separate rates of duty disability are assumed among Safety and General Members; rates for both sexes for Safety Members are combined. Below are sample rates:

<b>Rates of Service-Connected Disability</b>			
<b>Age</b>	<b><u>General</u></b>		<b><u>Safety</u></b>
	<b>Male</b>	<b>Female</b>	<b>All</b>
20	0.0043%	0.0002%	0.0759%

60	0.1637%	0.0349%	0.0000%
65	0.0000%	0.0000%	0.0000%

**17. Rates of Nonservice-Connected Disability**

Separate rates of ordinary disability are assumed among Safety and General Members; rates for both sexes for Safety Members are combined. The rates shown are applied after five Years of Service. Below are sample rates:

STANISLAUS COUNTY EMPLOYEES' RETIREMENT ASSOCIATION  
ACTUARIAL VALUATION REPORT AS OF JUNE 30, 2013

**APPENDIX B**  
**STATEMENT OF CURRENT ACTUARIAL ASSUMPTIONS AND METHODS**

<b>Rates of Non Service-Connected Disability</b>

**APPENDIX B**  
**STATEMENT OF CURRENT ACTUARIAL ASSUMPTIONS AND METHODS**

**19. Rates of Mortality for Disabled Retirees**

Rates of mortality for disabled Members are specified by the Retired Pensioners (RP) 2000 tables published by the Society of Actuaries (projected from 2000 to 2020 using Scale AA) set forward 7 years. Sample rates are as follows:

<b>Disabled Mortality Rates</b>		
<b>Age</b>	<b>Male</b>	<b>Female</b>
45	0.178%	0.152%
50	0.333%	0.315%
55	0.647%	0.602%
60	1.237%	1.100%
65	2.016%	1.832%
70	3.611%	2.963%
75	6.854%	4.892%
80	12.062%	8.892%
85	20.397%	14.843%
90	28.808%	21.098%

**20. Retired Member and Beneficiary Mortality**

Rates of mortality for retired Members and their beneficiaries are specified by the Retired Pensioners (RP) 2000 tables published by the Society of Actuaries (projected from 2000 to 2020 using Scale AA). Sample rates are shown below.

<b>Retired Mortality Rates</b>		
<b>Age</b>	<b>Male</b>	<b>Female</b>
45	0.116%	0.081%
50	0.149%	0.119%
55	0.247%	0.231%
60	0.489%	0.457%
65	0.961%	0.868%

ACTUARIAL VALUATION REPORT AS OF JUNE 30, 2013**

**APPENDIX B  
STATEMENT OF CURRENT ACTUARIAL ASSUMPTIONS AND METHODS**

**21. Mortality Improvement**

No mortality improvement is explicitly assumed; however we build a margin in our mortality assumption between the actual and expected number of deaths in order to assume some future mortality improvements. The experience study report for the period covering July 1, 2009 to June 30, 2012 contains a full description of these margins.

**22. Rates of Retirement**

Retirement is assumed to occur among eligible members in accordance with the table below:

<b>Rates of Retirement</b>		
<b>Age</b>	<b>General</b>	<b>Safety</b>
40-44	0.00%	5.00%
45-49	0.00%	5.00%
50	5.00%	15.00%
51	4.00%	15.00%
52	4.00%	15.00%
53	5.00%	15.00%
54	6.00%	15.00%
55	10.00%	15.00%
56	10.00%	15.00%
57	10.00%	20.00%
58	12.00%	30.00%
59	15.00%	30.00%
60	18.00%	100.00%
61	18.00%	100.00%
62	30.00%	100.00%
63	25.00%	100.00%
64	25.00%	100.00%
65	40.00%	100.00%
66	30.00%	100.00%
67	30.00%	100.00%
68	30.00%	100.00%
69	30.00%	100.00%
70	100.00%	100.00%

STANISLAUS COUNTY EMPLOYEES' RETIREMENT ASSOCIATION  
ACTUARIAL VALUATION REPORT AS OF JUNE 30, 2013

APPENDIX B  
STATEMENT OF CURRENT ACTUARIAL ASSUMPTIONS AND METHODS

**23. Changes in Actuarial Assumptions**

**Interest Credited to Employee Accounts:**

Last year's valuation assumed employee accounts were credited with 0.00% interest annually.

**Increases in Pay**

Base salary increase: 3.50% for all members (no special increase for County Safety for 2014).

**APPENDIX C  
PLAN PROVISIONS**

All actuarial calculations are based on our understanding of the statutes governing the StanCERA as contained in the County Employees Retirement Law (CERL) of 1937, with provisions adopted by the County Board of Supervisors, a district Board of Directors, or the StanCERA Board, effective through June 30, 2013. The benefit and contribution provisions of this law are summarized briefly below, (along with corresponding references to the State Code). This summary does not attempt to cover all the detailed provisions of the law.

**A. Definitions**

**Compensation:** Compensation means the cash remuneration for services paid by the employer. It includes base pay and certain differential, incentive, and special pay allowances defined by the Board of Retirement. Overtime is excluded, with the exception of overtime paid under the Fair Labor Standards Act that is regular and recurring.

For Tier 6 (PEPRA) members, only pensionable compensation up to the Social Security Taxable Wage Base (\$113,700 for 2013) will count for computing Plan benefits and employer contributions and employer contributions for those participating in Social Security. For those not participating in Social Security, the compensation cap is 120% of the Taxable Wage Base (\$136,440 for 2013). In addition, it is possible that some sources of compensation, such as any payments deemed to be terminal or special pays, may be excluded from the benefit and contribution computations for PEPRA members.

**Credited Service:** In general, Credited Service is earned for the period during which Member Contributions are paid. Since Tier 3 Members participate in a non-contributory Plan, their Credited Service is calculated based on their date of Membership only.

Temporary service for which the Member was not credited, or service for which the Member withdrew his or her Member Contributions, may be purchased by paying or repaying the Member Contributions with interest. The categories of services that credit may be purchased for are listed below:

- **Prior Part-time Service:** If a Member worked for an employer within the Association on a part-time or 'extra help' basis before his membership in the Retirement Association, the Member may buyback this service.
- **Intermittent Part-time Service**

APPENDIX C  
PLAN PROVISIONS

- **Prior full time Service:** Member may buyback full time service that may have been cashed out upon termination.
- **Leave of Absence (Including absence with State Disability or Worker's Compensation):** ): No unpaid leave of absence can be bought back except for absence due to medical reasons of up to one year.
- **Public Service:** Only Tier 1 and 4 Members may buy back this service.
- **Military Time:** Only Tier 1 and 4 Members may buy back this service.
- **Enhance Prior Tier Service:** Applies to certain active and deferred Members with Tier 1, 2 or 3 service.
- **Military "call up"**
- **AB 2766:** Only Safety Employees can buy back this service.

A percentage of credited sick leave may be credited according to the Member's applicable bargaining unit.

**Final**

**Compensation:** For Members belonging to Tier 2, Tier 3 and Tier 6, Final Compensation means the highest Compensation earned during any thirty six consecutive months of the Member's employment. For all others, it is the highest Compensation earned during any twelve months of employment.

**General Member:** Any Member who is not a Safety Member is a General Member.

**Safety Member:** Any sworn Member engaged in law enforcement, probation, or fire suppression is a Safety Member.

**B. Membership**

**Eligibility:** All full-time, permanent employees of Stanislaus County, City of Ceres, Stanislaus County Superior Court, Salida Sanitary District, East Side Mosquito Abatement, Keyes Community Services, Hills Ferry Cemetery and StanCOG hired on or after October 1, 1988 become Members on their date of appointment. All others hired before October 1, 1988 became Members on the first day of the calendar month following their date of appointment.

**APPENDIX C  
PLAN PROVISIONS**

Detailed membership eligibility according to Tier and membership date is shown in Table 1 on the following page.

**C. Service Retirement**

**Eligibility:** Tier 3 General Members are eligible to retire at age 55 if they have earned ten years of Credited Service. Tier 6 (PEPRA) General Members are eligible to retire at age 52 if they have earned five years of Credited Service. All other General Members are eligible to retire at age 50 if they have earned five years of Credited Service and have been an Association member for at least ten years. Alternatively, General non-PEPRA Members are eligible to retire at any age after having earned 30 years of Credited Service, or upon reaching age 70 with no service requirement.

Safety Members are eligible to retire at age 50 if they have earned five years of Credited Service and have been an Association member for at least ten years. Alternatively, Safety Members are eligible to retire at any age after having earned 20 years of Credited Service, or upon reaching age 70 with no service requirement. The 20-year Credited Service retirement eligibility is not applicable to Tier 6 (PEPRA) Safety Members.

**Benefit Amount:** The Service Retirement Benefit payable to the Member is equal to the Member's Final Compensation multiplied by credited service, the benefit factor from Table 1 and the age factor from Table 2 corresponding to the Member's code section. The appropriate code sections for each group are listed in Table 1.

For Tier 3 Members with Credited Service up to thirty five years, the percentage of Final Compensation may not exceed 70% and for those with more than thirty five years, it may not exceed 80%. For all other non-PEPRA Members, the percentage of Final Compensation may not exceed 100%. For those members integrated with Social Security (other than Tiers 3 and 6), Retirement Benefits based on the first \$350 of monthly Final Average Compensation are reduced by one-third.

Form of Benefit: The Service Retirement Benefit will be paid monthly beginning at retirement and for the life of the Member. If the member selects the unmodified benefit form, in the event of the Member's death 60% of the

**APPENDIX C  
PLAN PROVISIONS**

benefit will continue for the life of the Member's spouse or to the age of majority of dependent minor children if there is no spouse. For Tier 3 Members, the benefit payable to beneficiary is limited to 50%. In the event there is no surviving spouse or minor children, any unpaid remainder of the Member's accumulated contributions will be paid to the Member's designated beneficiary.

Actuarially equivalent optional benefit forms are also available.

Annually on April 1, benefits for all retired members other than those in Tier 3 are adjusted to reflect changes in the CPI for the San Francisco Bay Area since the prior year. Benefits may be increased or decreased, but the cumulative changes shall never reduce the benefit below the original monthly allowance. Annual increases may not exceed the COLA figures shown in Table 1, but CPI increases above this figure are "banked" and used for future increases when the CPI increases by less than the figures shown.

In addition, ad hoc cost of living adjustments have been granted in the past and may be granted in the future.

A lump sum benefit of \$5,000 will be payable upon the death of a retired member. No death benefit is payable for Tier 3 retired members.

**D. Service-Connected Disability:**

**Eligibility:** All non-Tier 3 Members are eligible for Service-Connected Disability Retirement benefits at any age if they are permanently disabled as a result of injuries or illness sustained in the line of duty. Tier 3 Members are not eligible to receive disability benefits.

**Benefit Amount:** The Service-Connected Disability Retirement Benefit payable to Members is equal to the greater of 50% of their Final Compensation or – if the Member is eligible at disability for a Service Retirement Benefit – the Service Retirement Benefit accrued on the date of disability.

**Form of Benefit:** The Service-Connected Disability Retirement Benefit will be paid monthly beginning at the effective date of disability retirement and for the life of the Member; in the event of the Member's death, 100% of the benefit will continue for the life of the Member's spouse or to the age of majority of dependent minor children if there is no spouse. In the event there is no surviving spouse or minor children, any unpaid remainder of the Member's accumulated contributions will be paid to the Member's designated beneficiary.

**APPENDIX C  
PLAN PROVISIONS**

Actuarially equivalent optional benefit forms and COLA adjustments (as described for the Service Retirement benefit) are also available. A lump sum benefit of \$5,000 will be payable upon the death of the member.

**E. Nonservice-Connected Disability**

**Eligibility:** Tier 3 Members are not eligible to receive disability benefits. All other Members are eligible for Nonservice-Connected Disability Retirement benefits if they are permanently disabled at any age after earning five years of Credited Service.

**Benefit Amount:** The Nonservice-Connected Disability Retirement Benefit payable to Tier 1 General Members is equal to the greatest of:

- 1.8% of Final Compensation at disability multiplied by years of Credited Service at disability;
- 1.8% of Final Compensation at disability multiplied by years of Credited Service projected to age 62, but not to exceed one-third of Final Compensation; or
- If the Member is eligible at disability for a Service Retirement Benefit, the Service Retirement Benefit accrued on the date of disability.

The Nonservice-Connected Disability Retirement Benefit payable to Tiers 2, 4 5, and 6 General Members is equal to the greatest of:

- 1.5% of Final Compensation at disability multiplied by years of Credited Service at disability;
- 1.5% of Final Compensation at disability multiplied by years of Credited Service projected to age 65, but not to exceed one-third of Final Compensation; or
- If the Member is eligible at disability for a Service Retirement Benefit, the Service Retirement Benefit accrued on the date of disability.

The Nonservice-Connected Disability Retirement Benefit payable to Safety Members is equal to the greatest of:

- 1.8% of Final Compensation at disability multiplied by years of Credited Service at disability;
- 1.8% of Final Compensation at disability multiplied by years of Credited Service projected to age 55, but not to exceed one-third of Final Compensation; or
- If the Member is eligible at disability for a Service Retirement Benefit, the Service Retirement Benefit accrued on the date of disability.

**APPENDIX C  
PLAN PROVISIONS**

**Form of Benefit:** The Nonservice-Connected Disability Retirement Benefit will be paid monthly beginning at the effective date of disability retirement, and for the life of the Member; in the event of the Member's death, 60% of the benefit will continue for the life of the Member's spouse or to the age of majority of dependent minor children if there is no spouse. In the event there is no surviving spouse or minor children, any unpaid remainder of the Member's accumulated contributions will be paid to the Member's designated beneficiary.

Actuarially equivalent optional benefit forms and COLA adjustments (as described for the Service Retirement benefit) are also available. A lump sum benefit of \$5,000 will be payable upon the death of the member.

**F. Death Benefit**

**Eligibility:** A Tier 3 Member's survivors are not eligible to receive death benefits. All other Members' survivors are eligible to receive different Death benefits dependent on the Member's cause of death and retirement eligibility.

**Benefit Amount:** In the event the Member's death resulted from injury or illness sustained in connection with the Member's duties, the Death Benefit payable to a surviving spouse, domestic partner or eligible dependent children will be the greater of 50% of the Member's Final Compensation at the time of death or the Service Retirement Benefit.

In the event the Member's death did not result from injury or illness sustained in connection with the Member's duties and at the time of death, the Member was eligible for Service Retirement or Non-Service Connected Disability (i.e. the employee was employed at least five years), the Death Benefit payable to the spouse, partner or children will be 60% of the survivor benefit based on benefit due on Member's date of death.

In all other cases, the designated beneficiary (not necessarily a spouse/partner/child) will receive a refund of the Member's contributions with interest plus one month of Final Compensation for each year of service to a maximum of six years.

**Form of Benefit:** Annuity death benefits will be paid monthly beginning at the Member's death and for the life of the surviving spouse/partner or to the age of majority of dependent minor children if there is no spouse/partner. Lump sum benefits will be paid as described above.

**APPENDIX C  
PLAN PROVISIONS**

COLA adjustments (as described for the annuity benefits) are also available.

**G. Withdrawal Benefits**

**Eligibility:** Tier 3 Members are not eligible to receive withdrawal benefits. All other Members are eligible for a Withdrawal Benefit upon termination of employment, if not eligible to receive or electing to waive a monthly benefit.

**Benefit Amount:** The Withdrawal Benefit is a refund of the Member's accumulated Contributions with interest. Upon receipt of the Withdrawal Benefit the Member forfeits all Credited Service.

**Form of Benefit:** The Withdrawal Benefit is paid in a lump sum upon election by the Member.

**H. Deferred Vested Benefit**

**Eligibility:** A Member is eligible for a Deferred Vested Benefit upon termination of employment after earning five years of Credited Service, including reciprocity service from another system. For Tier 3 Members, the vesting requirement is ten years of Credited Service.

The Member must leave his or her Member Contributions with interest on deposit with the Plan. This requirement does not apply to Tier 3 Members since they participate in a non-contributory Plan.

**Benefit Amount:** The Deferred Vested Benefit is computed in the same manner as the Service Retirement Benefit, but it is based on Credited Service and Final Compensation on the date of termination.

**Form of Benefit:** The Deferred Vested Benefit will be paid monthly beginning at retirement and for the life of the Member; in the event of the Member's death, 60% of the benefit will continue for the life of the Member's spouse or to the age of majority of dependent minor children if there is no spouse. For Tier 3 Members, the benefit payable to beneficiary is limited to 50%. In the event there is no surviving spouse or minor children, any unpaid remainder of the Member's accumulated contributions will be paid to the Member's designated beneficiary.

Actuarially equivalent optional benefit forms and COLA adjustments (as described for the Service Retirement benefit) are also available. A lump

**APPENDIX C  
PLAN PROVISIONS**

sum benefit of \$5,000 will be payable upon the death of the member. No death benefit is payable for Tier 3 retired members.

**I. Reciprocal Benefit**

**Eligibility:** A Member is eligible for a Reciprocal Benefit upon termination of employment after earning five years of Credited Service and entry, within a specified period of time, into another retirement system recognized as a reciprocal system by the Plan. For Tier 3 Members, the vesting requirement is ten years of Credited Service.

The Member must leave his or her Member Contributions with interest on deposit with the Plan. This requirement does not apply to Tier 3 Members since they participate in a non-contributory Plan.

**Benefit Amount:** The Reciprocal Benefit is computed in the same manner as the Service Retirement Benefit, but it is based on Credited Service on the date of termination and Final Compensation on the date of retirement; Final Compensation is based on the highest of the Compensation earned under this Plan or the reciprocal plan.

**Form of Benefit:** The Reciprocal Benefit will be paid monthly beginning at retirement and for the life of the Member; in the event of the Member's death, 60% of the benefit will continue for the life of the Member's spouse or to the age of majority of dependent minor children if there is no spouse. For Tier 3 Members, the benefit payable to beneficiary is limited to 50%. In the event there is no surviving spouse or minor children, any unpaid remainder of the Member's accumulated contributions will be paid to the Member's designated beneficiary.

Actuarially equivalent optional benefit forms and COLA adjustments (as described for the Service Retirement benefit) are also available.

A lump sum benefit of \$5,000 will be payable upon the death of the member. No death benefit is payable for Tier 3 retired members.

**J. Optional Benefit Forms**

Prior to retirement, a member may elect to convert his retirement allowance into a benefit of equivalent actuarial value in accordance with one of the optional forms described below.

1. A reduced retirement allowance payable during his life with the provision that on his death the excess, if any, of his accumulated

**APPENDIX C  
PLAN PROVISIONS**

- deductions at the time of retirement over the annuity payments made to him will be paid to his designated beneficiary or estate; or
2. A reduced retirement allowance payable during his life with the provision that after his death the reduced allowance will be continued for life to the beneficiary designated by him at the time of his retirement; or
  3. A reduced retirement allowance payable during his life with the provision that after his death an allowance of one-half of his reduced allowance will be continued for life to the beneficiary designated by him at the time of his retirement.

In addition, a member participating in Social Security may elect to receive an increased monthly allowance before age 62 (earliest possible receipt of Social Security benefits) and then take a reduced monthly allowance at age 62 and after. This option will not affect any monthly payments payable to a beneficiary. This option is not available to those receiving a disability benefit.

**K. Member Contributions**

Other than Tiers 3 and 6, all Members contribute a percentage of Compensation to the Plan through payroll deduction. The percentage contributed depends on the Member's nearest age upon joining the Plan. Members do not contribute after earning 30 years of Credited Service.

Tier 6 (PEPRA) Members must contribute half of the Normal Cost of the Plan. Contributions for these members will be based on the Normal Cost associated with their benefits; General and Safety members will pay different rates. Members will continue to contribute after earnings 30 years of service.

City of Ceres members in Tiers 1 and 4 pay the Tier 2 and 5 rates ("Full" rates), rather than the rates for their respective Tiers ("Half" rates).

Interest is credited semiannually to each Member's accumulated contributions. The crediting rate is set by the Board; the current annual rate is 0.00%.

The employee contribution rates are shown in the Appendix E.

**L. Changes in Plan Provisions**

There have been no changes in Plan provisions for the non-PEPRA tiers since the prior review. The PEPRA (Tier 6) tiers were included for the first time in the current valuation.

**APPENDIX D  
GLOSSARY**

**1. Actuarial Assumptions**

Assumptions as to the occurrence of future events affecting pension costs such as mortality, withdrawal, disability, retirement, changes in compensation, and rates of investment return.

**2. Actuarial Cost Method**

A procedure for determining the Actuarial Present Value of pension plan benefits and expenses and for developing an allocation of such value to each year of service, usually in the form of a Normal Cost and an Actuarial Liability.

**3. Actuarial Gain (Loss)**

The difference between actual experience and that expected based upon a set of Actuarial Assumptions during the period between two Actuarial Valuation dates, as determined in accordance with a particular Actuarial Cost Method.

**4. Actuarial Liability**

The portion of the Actuarial Present Value of Projected Benefits which will not be paid by future Normal Costs. It represents the value of the past Normal Costs with interest to the valuation date.

**5. Actuarial Present Value (Present Value)**

The value as of a given date of a future amount or series of payments. The Actuarial Present Value discounts the payments to the given date at the assumed investment return and includes the probability of the payment being made.

**6. Actuarial Valuation**

The determination, as of a specified date, of the Normal Cost, Actuarial Liability, Actuarial Value of Assets, and related Actuarial Present Values for a pension plan.

**7. Actuarial Value of Assets**

The value of cash, investments and other property belonging to a pension plan as used by the actuary for the purpose of an Actuarial Valuation. The purpose of an Actuarial Value of Assets is to smooth out fluctuations in market values.

**APPENDIX D  
GLOSSARY**

**8. Actuarially Equivalent**

Of equal Actuarial Present Value, determined as of a given date, with each value based on the same set of actuarial assumptions.

**9. Amortization Payment**

The portion of the pension plan contribution which is designed to pay interest and principal on the Unfunded Actuarial Liability in order to pay for that liability in a given number of years.

**10. Entry Age Normal Actuarial Cost Method**

A method under which the Actuarial Present Value of the Projected Benefits of each individual included in an Actuarial Valuation is allocated on a level basis over the earnings of the individual between entry age and assumed exit ages.

**11. Funded Ratio**

The ratio of the Actuarial Value of Assets to the Actuarial Liability.

**12. Normal Cost**

That portion of the Actuarial Present Value of pension plan benefits and expenses which is allocated to a valuation year by the Actuarial Cost Method.

**13. Projected Benefits**

Those pension plan benefit amounts which are expected to be paid in the future under a particular set of Actuarial Assumptions, taking into account such items as increases in future compensation and service credits.

**14. Unfunded Actuarial Liability**

The excess of the Actuarial Liability over the Actuarial Value of Assets.

STANISLAUS COUNTY EMPLOYEES' RETIREMENT ASSOCIATION  
ACTUARIAL VALUATION REPORT AS OF JUNE 30, 2013

**APPENDIX E**  
**MEMBER CONTRIBUTION RATES**

Employee contribution rates vary by member Group and Tier. City of Ceres members in Tiers 1 and 4 pay the Tier 2 and 5 rates ("Full" rates), rather than the rates for their respective Tiers ("Half" rates).

The rates were changed following an experience study covering the period 2009-2012. The current employee contribution rates are shown in the following tables.

Current rates were determined by EFI based on an interest rate of 7.75% per annum, an average salary increase of 3.50% per year, and the Retired Pensioners (RP) 2000 tables published by the Society of Actuaries (projected from 2000 to 2020 using Scale AA) with no age adjustment. The rates are blended using a male/female weighting of 25% male / 75% female for General members, and 80% male / 20% female for Safety members. Basic and COLA rates were determined based on an assumption that members would cease making contributions after 30 years of service.

Employee contribution rates for Tier 6 (PEPRA) members are determined based on half the Normal Cost for the PEPRA members (computed separately for General and Safety members, and for County and Ceres / Other District members). Due to the passage of SB13, contribution rates for PEPRA members are not rounded, and are recomputed each year.

**STANISLAUS COUNTY EMPLOYEES' RETIREMENT ASSOCIATION  
ACTUARIAL VALUATION REPORT AS OF JUNE 30, 2013**

**APPENDIX E  
MEMBER CONTRIBUTION RATES**

<b>PEPRA Rates</b>	
	<b>General (County)      General (Ceres)      Safety</b>
	7.63%                      7.70%                      12.82%
Assumptions:	
Interest:	7.75%
Salary:	2013 Valuation Scale (Service based, includes wage inflation at 3.50%)
Mortality:	Because the PEPRA contributions rates are based on 50% of the actual Normal Cost, the mortality rates are the same as those used in the Actuarial Valuation (RP2000 table projected from 2000 to 2020 using Scale AA)
Note:	There were no Ceres/District PEPRA Safety members as of June 30, 2013, so County data was used to set all Safety PEPRA rates
